with ingenuity

PRODUCT FEATURES

A DROP OF BLOOD

Blood coagulation function can be detected via ultramicro-detection of only 20ul blood samples, which meet the needs of infants and patients with difficulties in blood collection.

ONE-MINUTE TEST

Take PT for example, with an efficiency of 60 tests per hour, every detection can be done in 1 minute after loading the sample, thus to shorten the waiting time.

ONE-KEY TEST

The intelligent software system is equipped with a 3.5-inch color touch panel. The detection can be initiated by pressing one button.
